

Slip Knot Method

1.

1. Short end of yarn hangs in front of palm of passive hand. Loop yarn loosely around first two fingers (left in illustration) or, with thick yarn, the entire hand.

2.

2. Pull long end of yarn under yarn at back of fingers, then up and through the loop that has been formed.

3.

3. Hold short end between fingers of one hand and the loop created in 2 in between fingers of other hand. Pull to tighten.

4. Thread second yarn, the one to be attached (purple), through large loop. Hold ends of slip knot yarn (green) and pull them tight so that the attachment is secure. You will feel a snap!

4.
